L&T wins Orders (Major*) for Minerals & Metals Business

Mumbai, January 02, 2026: The Minerals & Metals (M&M) business vertical of L&T has secured major orders from the Steel Authority of India Limited (SAIL) and other customers, for EPC projects and products in the domestic metals sector.

L&T and SAIL share a long-standing relationship spanning several decades, marked by the successful execution of numerous metallurgical projects across India. This partnership continues to play a pivotal role in advancing India's steel manufacturing ecosystem through innovation, capacity augmentation and sustainable development.

Under its ambitious modernisation and expansion programme, SAIL plans to increase the crude steel capacity of the IISCO Steel Plant at Burnpur, West Bengal, from 2.5 MTPA to 6.5 MTPA. As part of this expansion, M&M has been awarded the complete engineering, procurement and installation package for critical process plants, including the Coke Oven Battery, By-Product Plant, Basic Oxygen Furnace and a specialised equipment package for material handling, which together form the core of the new steel complex.

Simultaneously, SAIL's Bokaro Steel Plant (BSL) in Jharkhand is undergoing a major upstream expansion, for which L&T has been awarded a package to establish Sinter Plant #2, reinforcing its strong presence in the steel sector.

In addition, the M&M business has secured multiple orders for specialised material handling equipment, including Stacker Reclaimers and Wagon Tippers, from various clients across India, reflecting its capability to deliver technologically advanced and reliable solutions across the minerals and metals value chain.

Commenting on these achievements, D K Sen, Advisor to CMD, Development Projects & Minerals & Metals, L&T, said: "L&T has been a major contributor to India's industrial growth story in the metals sector, and our association with SAIL is a proud chapter in our journey. These orders underscore L&T's ability to deliver world-class metallurgical infrastructure with engineering precision, safety and sustainability at the core. We are privileged to contribute to SAIL's expansion vision, which is vital to strengthening India's self-reliance in steel production".

T Kumaresan, Senior Vice President & Head - Minerals & Metals, L&T, added: "The trust placed in L&T by SAIL once again validates our expertise in delivering complex, technology-intensive projects under challenging schedules. These wins reaffirm our commitment to delivering projects on time, demonstrate our technical capabilities and adherence to project timelines. This also brings out our capabilities in end-to-end execution of complex process packages".

Background:

Larsen & Toubro is a USD 30 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focussed approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

**Order Classification*

<i>Classification</i>	Significant	Large	Major	Mega	Ultra-Mega
<i>Value in ₹ Cr</i>	1,000 to 2,500	2,500 to 5,000	5,000 to 10,000	10,000 to 15,000	>15,000
