# LTEPS Partners with EVR Motors to Accelerate Next-Gen EV Traction Motor Development in India

**Mumbai, May 27, 2026:** L&T Electronic Products & Systems (LTEPS) has entered into a strategic partnership with global electric propulsion technology company EVR Motors, to jointly develop, manufacture and deploy next-generation EV traction motors for the Indian market.

The collaboration brings together L&T's deep engineering, systems integration and manufacturing expertise with EVR Motors' breakthrough traction motor technology. The partnership aligns with Government of India's *Make in India* and *Aatmanirbhar Bharat* initiatives.

LTEPS and EVR Motors will work closely to industrialise advanced traction motor solutions optimised for Indian operating conditions, including high efficiency, compact packaging and reduced reliance on rare-earth materials.

The collaboration will cater to multiple vehicle segments – from two- and three-wheelers to passenger and commercial vehicles – supporting original equipment manufacturers (OEMs) meet evolving performance, cost and localisation requirements.

The traction motors are proposed to be manufactured at LTEPS's state-of-the-art manufacturing plant in Coimbatore, Tamil Nadu. Together with indigenously designed Motor Control Units, the traction motors will offer customers a complete EV drivetrain solution.

By combining local manufacturing with global-grade technology, LTEPS and EVR Motors reaffirm a shared vision of enabling sustainable, scalable and globally-competitive electric mobility solutions – supporting India's journey toward a cleaner and resilient transportation future.

Commenting on this, **Prashant Jain, Head - L&T Electronic Products & Systems, said:** "This partnership reflects our commitment to developing indigenous, high-performance solutions that support India's clean mobility ambitions. By combining advanced motor innovation with indigenous motor control unit, we bridge the gap between cutting-edge technology and real-world deployment across India's EV landscape".

**Opher Doron, CEO - EVR Motors, said:** "Our collaboration with LTEPS enables us to scale

innovation responsibly – delivering traction motor solutions that are not only technologically superior, but also manufacturable, reliable and tailored for Indian mobility needs”.

**Sajal Kishore, Managing Director - EVR India, said:** “India’s electric mobility transformation requires system-level powertrain integration and deep localisation. The collaboration between EVR Motors and L&T will enable next-generation electric powertrain solutions across mobility segments”.

LTEPS is a new business unit of Larsen & Toubro engaged in design, development and manufacture of advanced electronic systems and solutions for defence, aerospace, industrial and energy applications. It leverages deep engineering capability, systems integration expertise and world-class manufacturing to deliver high-reliability products across the full lifecycle - from concept to industrialisation. LTEPS aspires to play a strategic role in India’s indigenous technology development, supporting national priorities in self-reliance and high-tech manufacturing.

EVR Motors is a global electric propulsion technology company specialising in advanced, patented traction motor solutions for electric vehicles across multiple segments. The company is known for its innovative motor architecture that delivers high power density, reduced material usage and enhanced adaptability, supporting cost effective and scalable EV adoption. EVR Motors works with global automotive and industrial partners to accelerate the commercialisation of next-generation electric drivetrain technologies.

**Background:**

Larsen & Toubro is a USD 32 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, Products and Services, operating across diverse domains and multiple geographies. With a strong impetus towards AI & technology, customer-focussed approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
