

AMN Inducted To The Hall Of Fame In Manufacturing Today's Power List

In the 2012 Power List of India's top 50 industry leaders published by the renowned magazine, Manufacturing Today, our Chairman & Managing Director, Mr. A.M. Naik, has been inducted to the Hall of Fame.

Lauding the world-class approach to engineering that has seen L&T make critical contributions to defence, and working on key projects such as India's first nuclear-powered submarine, the magazine said that "there is no doubt that the driving force behind L&T has been Mr. Naik whose influence on both the country's safety and welfare is formidable and will endure in the years to come."

HALL OF FAMER

THE 2012 POWER List

AM Naik

Executive chairman, Larsen & Toubro Ltd

Even as chairman and managing director of Larsen & Toubro, Anil Manibhai Naik has never forgotten where he came from – a family of schoolteachers from southern Gujarat. Thanks to his influence, the values of learning and empathy have become well entrenched in L&T.

Providing vocational training to youth from the wrong side of the tracks through its various charitable initiatives, the company is instilling confidence and self-esteem in those less fortunate. Using state-of-the-art technology, the programme brings quality healthcare and education through mobile clinics and camps to the under-privileged in hard-to-reach locations. Under Naik's vision, L&T is not just an engineering conglomerate but a company with heart.

He graduated with a Bachelor's degree in mechanical engineering from Birla Vishvakarma Mahavidyalaya engineering college in Vallabh Vidyanagar and then travelled to Mumbai to begin his career at a private boilermaker firm. After moving to L&T, he began his career there as a junior engineer, and worked his way up through the ranks. Now at the helm, he is seeking to ensure L&T's place as not just a great Indian company, but a global one; and by establishing international manufacturing requirements as standard, the engineering major has been able to expand readily into international markets including the US, the Middle East and South-east Asia.

It is this world-class approach to engineering that has seen L&T help the Indian government reach the moon and make critical contributions to defence, working on key projects such as India's first nuclear-powered submarine.

There is no doubt that the driving force behind L&T has been Naik, who's influence on both the country's safety and welfare is formidable and will endure for years to come. ☺

50 Manufacturing Today JULY 2012

Manufacturing Today is a B2B monthly magazine focussed on the manufacturing sector, brought out by ITP Publishing India Private Ltd. It is a platform where industry issues are discussed and possible solutions are provided.
