Larsen & Toubro Vyoma and LexLegis Partner for Legal AI on Sovereign Cloud

Mumbai, February 20, 2026: Larsen & Toubro Vyoma (Vyoma), the next-generation sovereign AI cloud and digital infrastructure platform by L&T, today announced a strategic and exclusive partnership with Lexlegis.ai, a leading provider of legal and regulatory intelligence solutions, to launch Lexlegis Legal AI on Vyoma's Sovereign Cloud.

The partnership brings together Vyoma's secure, compliant and AI-ready India-sovereign cloud infrastructure with Lexlegis' deep domain expertise in legal research, regulatory intelligence and AI-driven insights.

The joint offering is designed to enable law firms, enterprises, financial institutions, government bodies and regulated industries to adopt advanced Legal AI capabilities, while meeting stringent requirements around data sovereignty, security and compliance.

Under the partnership, Lexlegis Legal AI will be hosted and operated on Vyoma's Sovereign Cloud, ensuring that sensitive legal and regulatory data are stored within India in alignment with applicable laws, regulatory frameworks and national data governance standards.

The solution will offer secure access to AI-powered legal research, drafting assistance, regulatory tracking and analytics, without compromising on confidentiality or control of data.

Speaking on the partnership, **Seema Ambastha, Chief Executive - Larsen & Toubro Vyoma**, said: "This strategic partnership with Lexlegis marks an important milestone in our vision to build a sovereign, AI-led digital infrastructure for India. Legal and regulatory data is among the most sensitive and mission-critical information for enterprises and institutions. By hosting Lexlegis Legal AI on our Sovereign Cloud, we are enabling customers to leverage the power of AI with the assurance of security, compliance and sovereign control".

Saakar Yadav, Founder - Lexlegis, added: "Lexlegis has always been committed to delivering trusted legal intelligence and innovation to the legal ecosystem. Trust is paramount in Legal AI, and for large enterprises, deploying AI on a private, sovereign cloud is both logical and essential. Our partnership with L&T Vyoma enables us to advance our Legal AI capabilities on a robust, compliant infrastructure that meets the highest standards of security and regulatory governance. Together, we aim to accelerate confident adoption of Legal AI across highly regulated sectors".

About Larsen & Toubro Vyoma

Larsen & Toubro Vyoma is L&T's sovereign, secure and integrated AI cloud and hyperscale data centre business, engineered to deliver AI-ready, high-density compute for India and global enterprises. Built on L&T's legacy of trust, precision and engineering excellence, Vyoma offers sovereign cloud platforms, GPU-as-a-Service, hyperscale colocation and mission-critical digital infrastructure that powers government, BFSI, healthcare, manufacturing and high-compute industries worldwide.
