L&T Rebrands Data Centre Business as *Larsen & Toubro-Vyoma*

Larsen & Toubro-Vyoma's next-gen campuses in Mumbai, Chennai and Bengaluru to deliver AI-sovereign and sustainable data infrastructure at scale

Mumbai, November 26, 2025: Larsen & Toubro (L&T) today announced the rebranding of its data centre business as *Larsen & Toubro-Vyoma* - a name inspired by the Sanskrit word for 'sky'. The business, launched in 2024, was earlier known as L&T-Cloudfiniti.

Larsen & Toubro-Vyoma extends L&T's core engineering and manufacturing expertise into the digital economy, with a forward-looking approach to data infrastructure that emphasises scalability, security, sustainability and Responsible AI.

By integrating advanced AI capabilities, cloud-native architectures and low-carbon operations, *Larsen & Toubro-Vyoma* offers a trusted platform for resilient digital foundations – enabling businesses and communities to thrive in an increasingly connected world.

Commenting on the rebranding, **Mr S N Subrahmanyam, Chairman & Managing Director, L&T, said:** “As India's data centre market is projected to grow exponentially over the next few years, *Larsen & Toubro-Vyoma* embodies our vision to build a trusted ecosystem that supports the nation's digital ambition. By integrating sovereign capabilities, AI-readiness and sustainable operations, we aim to enable bold innovation and secure growth”.

Ms Seema Ambastha, Chief Executive - Larsen & Toubro-Vyoma, added: “As L&T-Cloudfiniti transitions into its new avatar *Larsen & Toubro-Vyoma*, we embrace a name that mirrors our limitless vision – from the infinite power of cloud to the cosmic intelligence of vyoma. This rebranding represents our journey towards a more connected, intelligent and sovereign digital future”.

India's digital economy is witnessing rapid expansion driven by cloud adoption, AI-led workloads and data localisation. Policy initiatives such as *Digital India* and *Atmanirbhar Bharat* are further reinforcing the need for sovereign, compliant infrastructure.

Larsen & Toubro-Vyoma is strategically positioned at the intersection of these growth drivers – combining scale, sovereignty, AI-readiness and sustainability. The brand will spearhead L&T's expansion into hyperscale data centres across key Indian metros including

Mumbai, Chennai and Bengaluru, with facilities designed to support high-performance computing and advanced data storage requirements.

Larsen & Toubro-Vyoma reflects L&T's commitment to building future-ready platforms that empower enterprises and communities to innovate, collaborate and grow with confidence.

About Larsen & Toubro-Vyoma

Larsen & Toubro-Vyoma is a next-generation digital infrastructure services provider from the L&T Group. Focussed on building AI-ready, hyperscale data centres, it offers a comprehensive suite of solutions, including colocation, GPU Cloud and cloud-native platforms. With facilities in cities like Mumbai, Chennai and Bengaluru, it supports high-performance workloads across AI, cloud and enterprise transformation. *Larsen & Toubro-Vyoma* brings together the credibility of L&T with cutting-edge innovation to power the future of digital infrastructure for enterprises, hyperscalers and public-sector clients globally.
