L&T Wins (Significant*) Order for Battery Energy Storage System in Gujarat

Mumbai, November 25, 2026: Two L&T verticals – the Renewables business and L&T Electronic Products & Systems (LTEPS) - have jointly won an order to develop a 300 MW / 900 MWh Battery Energy Storage System (BESS) at Khavda in Gujarat.

The project will feature a three-hour BESS, with a power capacity of 300 MW and an energy storage capacity of 900 MWh. By storing surplus renewable energy during periods of high generation and releasing it during peak demand, it will help maximise clean-energy utilisation, strengthen grid stability, and enhance the flexibility and reliability of power supply.

The advanced BESS solution will incorporate liquid-cooling technology to deliver higher power density, enhanced safety and a longer operating life. The facility will play a crucial role in improving grid flexibility and enabling greater integration of renewable energy into India's power network.

The order further strengthens L&T's position in the energy storage sector and reflects the trust and confidence that clients place in the Company's ability to deliver complex projects at scale.

Background:

Larsen & Toubro is a USD 32 billion Indian multinational engaged in EPC Projects, Hi-Tech Manufacturing, Products and Services, operating across diverse domains and multiple geographies. With a strong impetus towards AI & technology, customer-focussed approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.

Order Classification

Classification	**Significant**	**Large**	**Major**	**Mega**	**Ultra-Mega**
Value in ₹ Cr	1,000 to 2,500	2,500 to 5,000	5,000 to 10,000	10,000 to 15,000	> 15,000
